Sustainability

SUSTAINABLE MATERIALS + INNOVATION

From sweat-wicking fabrics to the bouncy foam under your feet, materials make up more than 70% of any product's footprint. By inventing more efficient materials and reusing existing plastics, yarns and textiles, we're making big strides on our journey to zero carbon and zero waste.

Recycled Polyester

Our recycled polyester is made from plastic bottles which are cleaned, shredded into flakes, converted into pellets, and then spun into a high-quality yarn. In addition to reducing waste, recycled poly lowers carbon emissions by up to 30% compared to virgin poly, and diverts an average of 1 billion plastic bottles annually from landfills and waterways.

Shop Recycled Polyester

Sustainable Cotton

As of 2020, 100% of the cotton we use across our entire product line is certified organic, recycled, or Better Cotton sourced through the Better Cotton Initiative (BCI). BCI works to improve cotton farming globally, sourcing cotton through a system of Mass Balance. All of our organic cotton is grown without fossil fuel-derived pesticides or synthetic fertilizers and we also recycle more than 1.5 million pounds of cotton each year.

Shop Sustainable Cotton

Recycled Nylon

Our recycled nylon is transforme a variety of materials, like carpe used fish nets. The nylon is clea sorted, and converted into flake before undergoing a chemical o mechanical recycling process. T recycled nylon yarn reduces our emissions by up to 50% compa virgin nylon.

TAKING ACTION, TOGETHER

Did you know? The “Sunburst” symbol was created in the 1970s as a circular option where asymmetry of the Swoosh logo didn’t work. Since then, in the same nature of our circular design philosophy, we’ve repurposed the logo. Today, when you see this logo, you see one small step in our journey to Move to Zero.

Get the latest Nike Sustainability news and discover new ways we can help protect the future of sport together.
